目錄

在FlexGroup SnapMirror關係中擴充功能區 1
在FlexGroup SnapMirror關係中擴充功能區 1
擴充FlexGroup SnapMirror關係的來源區段 1
擴充FlexGroup SnapMirror關係的目的地需求區 2

在FlexGroup SnapMirror關係中擴充功能區

在FlexGroup SnapMirror關係中擴充功能區

從ONTAP 功能介紹9.3開始、您可以FlexGroup 在磁碟區中加入新的成分、以擴充FlexGroup SnapMirror關係中的來源供應區和目的地供應區。您可以手動或自動擴充目的地磁碟區。

關於這項工作

- 擴充之後FlexGroup 、SnapMirror關係的來源等量磁碟區和目的地FlexGroup 的等量資料必須相符。

  如果磁碟區中的成員數量不相符、SnapMirror傳輸就會失敗。

- 擴充程序進行中時、您不應執行任何SnapMirror作業。
- 如果在擴充程序完成之前發生災難、您必須中斷SnapMirror關係、並等待作業成功。

> 當擴充程序只在發生災難時才進行時、您應該中斷SnapMirror關係。發生災難時、中斷作業可能需要一些時間才能完成。執行重新同步作業之前、您應等待中斷作業順利完成。如果中斷作業失敗、您必須重試中斷作業。如果中斷作業失敗、FlexGroup 在中斷作業之後、部分新的成分可能仍留在目的地的景點。最好先手動刪除這些成分、然後再繼續。

擴充FlexGroup SnapMirror關係的來源區段

從功能更新9.3開始ONTAP 、您可以FlexGroup 在來源Volume中加入新的成分、以擴充SnapMirror關係的來源功能。您可以使用擴充一般FlexGroup 的邊量（讀寫磁碟區）的相同方式來擴充來源磁碟區。

步驟

1. 展開來源FlexGroup 供應區：`volume expand -vserver vserver_name -volume fg_src -aggr-list Aggregate name、... [-agger-list-plier bizents_per _agggr]'

```
cluster1::> volume expand -volume src_fg -aggr-list aggr1 -aggr-list
-multiplier 2 -vserver vs_src

Warning: The following number of constituents of size 50GB will be added
to FlexGroup "src_fg": 2.
Expanding the FlexGroup will cause the state of all Snapshot copies to
be set to "partial".
Partial Snapshot copies cannot be restored.
Do you want to continue? {y|n}: Y
[Job 146] Job succeeded: Successful
```

   將磁碟區擴充為部分之前所取得的所有Snapshot複本狀態。

擴充FlexGroup SnapMirror關係的目的地需求區

您可以FlexGroup 自動或手動擴充目的地的聲音量、並重新建立SnapMirror關係。根據預設、SnapMirror關係會設定為自動擴充、而來源FlexGroup Volume擴充時、目的地的還原Volume會自動擴充。

您需要的是 **#8217** ；需要的是什麼

- 來源FlexGroup 的流通量必須已經擴大。
- SnapMirror關係必須處於「napSnapMirror」狀態。

  SnapMirror關係不得中斷或刪除。

關於這項工作

- 建立目的地FlexGroup 時、預設會將Volume設定為自動擴充。

  如有需要、您可以修改目的地FlexGroup 的聲音量、以手動擴充。

  最佳實務做法是FlexGroup 自動擴充目的地的景點。

- 所有SnapMirror作業都會失敗、直到來源FlexGroup 的Setrror Volume和目的地FlexGroup 的Setrror Volume都已擴充、而且擁有相同數量的成分為止。
- 如果FlexGroup 您在SnapMirror關係中斷或刪除之後擴充目的地的聲音區、就無法再次重新同步原始關係。

  如果您想要重複使用目的地FlexGroup 的流通量、則在刪除SnapMirror關係之後、不得擴充磁碟區。

選擇

- 執行更新傳輸FlexGroup 以自動擴充目的地的更新磁碟區：

  a. 執行SnapMirror更新傳輸：「napmirror update -destination-path Svm:vol_name」

  b. 驗證SnapMirror關係的狀態是否為「napmirror」狀態：「napmirror show」

```
cluster2::> snapmirror show

Progress
Source            Destination Mirror  Relationship   Total
Last
Path        Type  Path        State   Status         Progress
Healthy Updated
----------- ---- ------------ ------- -------------- ---------
------- --------
vs_src:src_fg
            XDP  vs_dst:dst_fg
                             Snapmirrored
                                     Idle           -         true
-
```

根據Aggregate的大小和可用度、會自動選取Aggregate、FlexGroup 並將符合來源版的組成要素的新成分新增至目的地FlexGroup 版的流通量。擴充之後、系統會自動觸發重新同步作業。

- 手動擴充目的地FlexGroup 的目標區域：
  a. 如果SnapMirror關係處於自動擴充模式、請將SnapMirror關係設定為手動擴充模式：「napmirror modify -destination-path Svm:vol_name -is自動擴充啟用的假」

```
cluster2::> snapmirror modify -destination-path vs_dst:dst_fg -is
-auto-expand-enabled false
Operation succeeded: snapmirror modify for the relationship with
destination "vs_dst:dst_fg".
```

  b. 靜止SnapMirror關係：「napmirror quiesce -destination-path Svm:vol_name」

```
cluster2::> snapmirror quiesce -destination-path vs_dst:dst_fg
Operation succeeded: snapmirror quiesce for destination
"vs_dst:dst_fg".
```

  c. 展開目的地FlexGroup 的循環磁碟區：`volume expand -vserver vserver_name -volume fg_name -agggr-list Aggregate name、... [-agger-list-plier bizents_per _agggr]'

```
cluster2::> volume expand -volume dst_fg -aggr-list aggr1 -aggr-list
-multiplier 2  -vserver vs_dst

Warning: The following number of constituents of size 50GB will be
added to FlexGroup "dst_fg": 2.
Do you want to continue? {y|n}: y
[Job 68] Job succeeded: Successful
```

d. 重新同步SnapMirror關係：「napmirror resSync -destination-path Svm:vol_name」

```
cluster2::> snapmirror resync -destination-path vs_dst:dst_fg
Operation is queued: snapmirror resync to destination
"vs_dst:dst_fg".
```

e. 驗證SnapMirror關係的狀態是否為「napmirror」：「napmirror show」

```
cluster2::> snapmirror show

Progress
Source            Destination Mirror  Relationship   Total
Last
Path        Type  Path        State   Status         Progress
Healthy Updated
----------- ---- ------------ ------- -------------- ---------
------- --------
vs_src:src_fg
            XDP  vs_dst:dst_fg
                             Snapmirrored
                                     Idle           -         true
-
```
